Work Experience

User Experience Team of One

Cheqd

Aug 2023 - Dec 2024

Collaborated closely with the CTO, Engineering, and Marketing teams to maintain a strong feedback loop. Enforced brand identity and design guidelines for streamlined frontend development. Key contributions:

- Quick cycles of wireframe, design, build and iterate as part of fast paced startup culture
- Introduced a Design System and Style Guide featuring refined color palettes
- Designed and Developed creds - Creator Studio, a platform that allows you to build, issue and manage verifiable credentials
- Integrations with LayerCharts and ChartJS to build a feature-rich dashboard with analytics on credentials
- Accessible and reusable Svelte components in a centralized component library for seamless use across projects
- Code refactors to fix persistent frontend inconsistencies
- Enhanced user journeys and simplified UX flows encouraging usability of the product

Software Engineer

OpenRegistry

Aug 2021 - Current

As a founding member of OpenRegistry, worked on designing and developing the WebApp along with API integrations. Key contributions are as follows:

- Brand Identity, Design system, Illustrations, zines and Logo design for OpenRegistry
- Comparative Assessment with DockerHub for overall product inspiration and Cloudflare pages deployment for GitHub automated build feature
- Frontend design and responsive app development with Svelte
- Accessible and Reusable svelte components with MeltUI. Accessibility score between 97 and 100 for the entire WebApp
- Designed and built OpenRegistry Blog and Documentation sites with Svelte

Network Engineer

Tech Mahindra

Apr 2019 - Oct 2021

Worked in a Network Operations Center to support and ensure 24/7 network availability for one of the Australia's biggest construction firms with over 360 sites across country

- Automated firmware upgrade on HP Aruba switches saving weeks for manual work

Worked with US based ISP provisioning field level network connection requests for new installs, augmentation of service and disconnecting the services
